

# Data Visualisation with PowerBI

Transforming digital solutions to  
unlock the power of your data

Software **SOLVED**  
Developed with you

## Business intelligence like never before

Go from data to insight in minutes. Any data, any way, anywhere, and all in one view.

**“ PowerBI GIVES TEAM MEMBERS ALMOST FREE ACCESS TO THE DATA TO CONSUME IN ANY WAY THEY WANT. THE TURNAROUND TIME IS A FRACTION OF WHAT IT USED TO BE.”**

Mark Everest,  
IS Development Manager at Renault Sport  
Formula One Team

DEFINE, DESIGN, DELIVER

## Is your data delivering actionable insight?

It's said that data is the new oil. Immensely valuable but hard to extract.

The value is in the better, faster decision-making that real-time, clear access to relevant data can deliver. Decisions that can increase efficiency, cut costs and boost profitability right across your organisation.

The difficulty is in the way this valuable data is housed in multiple formats in multiple systems.

PowerBI is the powerful, low-cost business intelligence tool that lets users connect to the data that matters to them, wherever it is.

Using data visualisation and dashboards, every department can gain insights into performance and the results of change. And they can share real-time data with customers and partners to build better relationships.

Whether you are in sales, marketing, operations, distribution, IT, HR or finance, Software Solved deliver engaging dashboards and actionable insight with PowerBI.

## Call on Software Solved for expert help

As PowerBI experts we work with the smallest and largest organisations to help them bring their data to life.

# Unlock insights in every department with data visualisation

## Finance

Are you getting the answers you need about financial performance? With PowerBI you can improve decision-making with immediate access to data visualisation. And helping other departments to self-serve has never been easier.

## Marketing

Are you searching for market insight and campaign ROI? PowerBI helps you analyse campaigns and manage follow-ups effectively for better ROI. Dashboards let you analyse segments, channels and campaigns to target more effectively.

## Sales

Want to forecast sales better, hit your sales target, and identify up-sell opportunities? Use PowerBI to gain insights that CRM systems can't deliver around prospecting, pipelines and opportunities to close more business.

## Human resources

Need to stay up to date on the progress of your initiatives? With PowerBI dashboards you can check individual progress against goals and metrics; track holidays, training and sickness; and monitor recruitment programme success.

## IT

Want to improve productivity in a quick, affordable way? Implement PowerBI to monitor networks, services, applications, security and staffing all in one place. Integrating your dashboard with new and existing solutions gives you an end-to-end approach to data analytics.

## Operations

Is your organisation truly data-driven? Take advantage of PowerBI to track manufacturing, stock levels, spares and shopfloor activities across operations and into your supply chain. Data visualisation is your opportunity to optimise performance and deliver better service.

# Integration with PowerBI

PowerBI connects to over 800 software systems, from spreadsheets through web pages to big data, wherever it is stored. That includes Oracle, MS Dynamics, Salesforce, SharePoint, MailChimp and many more. Integrate your data on premise or in the cloud, to unlock your data and unlock your true potential.

## Use data visualisation for business advantage now

Achieve your goals faster.

Discover where you need to take action rapidly to keep on course for greater profitability.

With easy access to real-time data you can monitor performance against targets at any time. Predictive intelligence delivered through dashboards lets you identify changing trends and potential issues, and get ahead of them.
